

Nagoya University Graduate School of Medicine
Integrated Immunity, Genome, and Metabolism Research Unit

Call for Applications for Designated Associate Professor Position

1. Number of available positions : Designated Associate Professor, 1 person
2. Affiliation : Nagoya University Graduate School of Medicine
3. Job description :

The Department of Immunology at Nagoya University Graduate School of Medicine is seeking outstanding biomedical scientist studying molecular mechanisms of neoplastic disease to run an independent and nationally/internationally-recognized research program. The department invites applications from qualified individuals able to establish themselves as research leaders and demonstrate prowess in interdisciplinary collaborative scientific research. We are willing to consider researchers who can contribute to the development of emerging molecular analysis technologies and its applications to biomedical research in the area of cancer biology, but are especially interested in individuals in research areas relating to cancer epigenetics, tumor heterogeneity, genetic screening, next generation sequencing including single-cell sequencing, and basic analyses of multi-platform high-dimensional data including genomic, transcriptomic, proteomic, and metabolic data analyses.

4. Period of employment: Mar 1, 2019 ~ Mar 31, 2023
Retirement: Mar 31st following age 65

5. Conditions

- 1) Annual salary according to the stipulations of salary system of Nagoya University.
- 2) Insurance coverage: Ministry of Education, Culture, Sports, Science and Technology Mutual Aid insurance; Pension insurance; Unemployment insurance; Workers' Accident insurance
- 3) Work place : Nagoya University 65, Tsurumai-cho, Showa-ku, Nagoya 466-8550 Japan

6. Qualifications

Successful candidate will be committed to high-impact research within a collaborative, diverse and inclusive research environment. A Ph.D. in life science or a related field is required. Candidates should have research training and experience in the field of neoplastic disease and molecular biology. Successful candidates are expected to incorporate state-of-the-art, interdisciplinary approaches in cancer cell biology to bridge the research areas mentioned above, develop a high-profile program of scholarly research, and excel in teaching and mentoring at the graduate level. Candidates will already have established, a high-quality, independent research program and have a track record of mentorship and teaching. A demonstrated record of high-quality peer-reviewed publications is essential, and candidates must demonstrate a sustained record of excellent research productivity.

7. Application Documents

Please send the following documents as PDF files.

- 1) CV / resume (with attached photograph)
- 2) List of research achievements (books, published papers, conference presentations, etc.)
- 3) Research proposal

8. Selection process: screening of documents and interview by Skype

9. Application deadline: Dec 14 (Fri), 2018

10. Inquiries and documents to be sent to :

Department of Immunology
Nagoya University Graduate School of Medicine
65, Tsurumai-cho, Showa-ku, Nagoya
466-8550 Japan
Phone : +81-52-744-2134
E-mail : n.oiswa7@med.nagoya-u.ac.jp

Please be aware, that the documents submitted will be used for this application screening only, will not be used for other purposes than mentioned in this call for applications, and that the documents will not be returned.
